Undergraduate, Post-Baccalaureate, and High School Students

46 undergraduate, 1 post-Baccalaureate, and 2 high school students were involved in research in our lab. These students were trained in running quantum chemical calculations in a Unix environment. Projects typically involved using running ground and excited-state calculations for organic dyes on a high-performance computing cluster, developing an independent project with help from graduate lab members, and discussing results in context of experimental literature in an end-of semester report.

Teaching

Courses Developed and Instructed at GSU

Photophysics, Photochemistry, and Photobiology (CHEM 4470, CHEM 6470).

A 3-credit course that discusses events occurring in molecular systems following absorption of light. The course covers essential background concepts, how light absorption is accompanied by changes in molecular electronic and nuclear structure (photophysics), how such photophysical processes can lead to molecular transformations (photochemistry), and examples of photophysical and photochemical processes that occur in biological systems such as photoreceptor proteins and DNA (photobiology).

Courses Instructed at GSU

Physical Chemistry I (CHEM 4110, CHEM 6110)

Physical Chemistry Problem I (CHEM 4111).

Physical Chemistry II (CHEM 4120, CHEM 6120).

Seminar in Chemistry (CHEM 4940, CHEM 8800).

Biophysical Chemistry (Co-taught, Chem 8510).

Directed Research and Laboratory courses (CHEM 4160, CHEM 4170, CHEM 4950, CHEM 8910, CHEM 8999)

Service Activities

Conferences and Workshops Organized

2. 2021 Atlanta Symposium on Computational and Theoretical Chemistry.

Georgia State University, Atlanta, GA. **Oct 2021.**

1. *Developments in QM/MM and Embedding Models for Photochemical and Electron Transfer Processes.*

Postponed to 2023 due to COVID-19. Was scheduled for July 2020 in Telluride, CO, but is postponed to 2023. Instead, I helped organize and host two online talks as part of the Telluride Science Summer Lecture Series.

Telluride Science Research Center, Telluride, CO. **Oct 2020.**

Co-organized with Profs. Lyudmila Slipchenko and Debashree Ghosh.
